LAWN GRASS SEED

Nothing adds so much to the beauty of a country place as a well-kept, velvety lawn. In order to secure this, it is necessary that the proper grasses should be sown. More disappointment results from sowing inferior seed than from any other cause.

WOEHLER'S ALL BENT MIXTURE

For finest lawn and for soils slightly acid. This mixture is composed entirely of bent grasses (Agrostic varieties), South German mixed bent, Rhode Island bent and superfine quality of fancy recleaned red top. Bent grasses require good soil with rotted manure well worked in and several top dressings during the growing season with sulphate of ammonia. Use at least one pound to 250 square feet. Lb. \$1.25, 5 lbs. \$5.75, 12½ lbs. \$13.50, 25 lbs. \$26.00, 100 lbs. \$100.00.

WOEHLER'S BEST SELECTED

Our mixture is composed of the finest American grasses in proper proportions of such kinds as are best adapted for our hot, dry summers, and will form a close, velvety lawn very quickly after being sown. Lb. 65c., 5 lbs. \$3.00, 10 lbs. \$6.00, 25 lbs. \$14.00, 100 lbs. \$55.00.

WOEHLER'S SPECIAL LAWN SEED

For those who desire quick results at low cost, rather than fine quality. Lb. 50c., 5 lbs. \$2.45, 10 lbs. \$4.50, 25 lbs. \$11.50.

WOEHLER'S SHADY LAWN SEED

Correctly proportioned of varieties which grow well in the shade or partially shaded areas. Lb. 75c., 5 lbs. \$3.50, 10 lbs. \$6.50, 25 lbs. \$15.50.

BANK AND TERRACE MIXTURE

is composed of deep rooting grasses which, if once established, will hold the soil and prevent washing. Lb. 75c., 5 lbs. \$3.50, 10 lbs. \$6.50, 25 lbs. \$15.50.

Quantity to Order

For a space 15 x 20 or 300 square feet, 1 lb. is required for new, or ½ lb. for renovation (100 lbs. per acre)—double quantity for quick result.

Garden Making and Keeping

By HUGH FINDLAY, B.Sc.Ag., M.A.

Assistant Professor of Agriculture
Columbia University

HERE is a garden book written from a practical point of view by a gardener of the newer school. It is designed to serve the needs of that large and rapidly increasing multitude of suburban garden makers.

Professor Findlay is an experienced technical horticulturist and an enthusiastic gardener.

It is a friendly book, for the author feels with the garden worker the stumbling blocks that so frequently are lightly slurred over. The various phases of the garden problem are given individual chapters. But this garden is not the larger dream nor does it deal with the production of fruits and vegetables, but is mostly of flowers, shrubs, trees, which the smaller modern-day garden space will accommodate.

The author gives invaluable lists of plants for best results according to season, soil, culture, climate and colour.

"A storehouse of essential details, wherein specific desired information is easily found. . . . Has a definite place in our literature of house grounds beautification."

—N. Y. HERALD-TRIBUNE.
